

Technology Challenges for Future Far IR and Submm Systems

James B. Breckinridge

(Email: James.B.Breckinridge@jpl.nasa.gov)

Jet Propulsion Laboratory, Pasadena, California

Requirements, technology hurdles, inventions, schedules, metrics and need for clear system visions will be discussed in a conversation with members of the audience. The strong interdependence between structures, mirrors, thermal control, focal planes and science establishes a frame work for planning the next 10 years.
